PROFESSIONAL SUMMARY

Computer-engineering graduate (June 2026) working as a QA Consultant at Neoalians (Tunis). On the Zena project I run manual functional testing and automation - Playwright for UI/E2E, Postman and Bruno for API testing - with JIRA and CI/CD pipelines. As an intern in the AI department, I built Neotest, an LLM-powered platform that automates manual testing end to end (PRD to auto-generated test cases to live self-healing execution to dashboard). A full-stack and SQL/BI background gives me a developer's understanding of the systems I test. Seeking a junior QA Engineer role.

CORE COMPETENCIES

Test Automation (Playwright)

JavaScript / TypeScript

API Testing (Postman, Bruno)

CI/CD Pipelines

Verification & Validation

ISTQB Test-Case Design

JIRA + Xray

Full-Stack Development

SQL / Data Validation

Agile Scrum

WORK EXPERIENCE

Neoalians - Tunis (Lac 2), Tunisia March 2026 - Present

QA Consultant

- Manual and automated testing on the Zena project
- Functional manual testing and test-case design
- End-to-end / UI test automation with Playwright
- API testing with Postman and Bruno
- Defect tracking and test workflow in JIRA, integrated with CI/CD pipelines

Neoalians - AI Department (Final-Year Project / PFE) - Tunis, Tunisia March 2026 - July 2026

AI Developer Intern - "Neotest" (LLM-powered QA automation platform)

- Built Neotest, a full-stack, multi-tenant platform that automates the QA lifecycle end to end: ingests PDF/DOCX requirements, uses an LLM to extract user stories and generate ISTQB test cases (positive / negative / edge / boundary), runs a human-in-the-loop approval gate, then executes the tests in a real browser
- AI execution engine: LLM agentic loop driving Playwright via function-calling tools, plus a deterministic REPLAY mode and self-healing of broken locators; live WebSocket streaming (screenshot + console + step status)
- Enterprise QA integration: pushes generated tests and run results to Jira via Xray Cloud (Test / Test Execution issues); exports PDF/Excel reports with AI root-cause analysis; per-run LLM cost tracking; auto-generates standalone runnable Playwright scripts (codegen)
- Stack: Django 5 + DRF, Django Channels / Daphne, Celery, PostgreSQL, Redis, Docker | Next.js 16 / React 19 / TypeScript / Tailwind CSS | LiteLLM (provider-agnostic - Claude / OpenAI / Gemini) | Playwright

Siveco Groupe - Tunis, Tunisia Aug 2023 - January 2026

Report Designer & International Back-Office Support

- Led the complete migration of Crystal Reports to Jasper Reports, ensuring operational continuity
- Designed and developed complex interactive BI reports using advanced SQL and Jasper Reports
- Performed in-depth functional testing on the Coswin Internet CMMS software
- Provided multilingual technical support (French/English) to international clients via email and phone
- Ran client training sessions on optimal use of reporting tools
- Technologies: Oracle, SQL, Jasper Reports, Crystal Reports

Full-Stack Developer - Final Year Project (PFE)

- Developed a regional analytics dashboard with interactive visualizations for strategic decision-making
- Implemented a user content personalization system with performance optimization
- Designed the application architecture and implemented REST API endpoints
- Technologies: Django, Python, MySQL, JavaScript, HTML5/CSS3, Bootstrap

Établissements Abdelmoula - Denden, Tunisia

Jul 2022 - Aug 2022

Developer Intern - Application Migration

- Successfully migrated a legacy desktop application to a modern web platform
- Refactored code and modernized the application architecture
- Technologies: C# .NET, ASP.NET Core MVC, HTML5, CSS3

PROJECTS

Pro-Connect - B2B Collaboration Platform (2024)

Web platform connecting businesses with a talent-matching system; integrated an AI chatbot for analyzing and defining project needs; secure JWT authentication with role and permission management; bilingual, real-time collaboration.

Spring Boot, Angular, MySQL

HamHama - Culinary Social Network (2024)

Recipe-sharing social platform with AI recipe generation (images + nutritional calculation); microservices architecture with documented REST API and JWT authentication.

Spring Boot, Angular, MySQL

EDUCATION

Computer Engineering Degree (Diplôme d'Ingénieur) École Polytechnique Internationale (EPI) - Tunis, Tunisia 2023 - 2026

Graduated June 2026. Specialization in software engineering and application development; evening program alongside professional experience.

Bachelor's in Enterprise Information Systems École Supérieure d'Économie Numérique (ESEN) - Tunis, Tunisia 2021 - 2023

Bachelor's in Enterprise Information Systems Faculté des Sciences de Nabeul - Nabeul, Tunisia 2019 - 2021

CERTIFICATIONS

DELFI B2 - Diplôme d'Études en Langue Française French B2

IELTS B2 - International English Language Testing System English B2

Languages: French (B2), English (B2), Spanish (A1, beginner)

SKILLS

QA & Testing: Manual & functional testing, ISTQB test-case design (positive/negative/edge/boundary), Test automation, API testing (Postman, Bruno), E2E/UI automation (Playwright), Agentic browser testing, Self-healing replay, Playwright codegen, AI-driven test generation, Requirements analysis, Test reporting

Test & Project Tools: JIRA, Xray (Cloud), CI/CD pipelines, Postman, Bruno, Playwright, Trello

Programming: Java (JEE), Python, PHP, JavaScript, TypeScript, SQL

Backend: Spring Boot, Django, Django REST Framework, Django Channels / Daphne, Celery, ASP.NET Core MVC

Frontend: Angular, Next.js, React, HTML5, CSS3, Tailwind CSS, Redux, Bootstrap

Databases: Oracle, MySQL, SQL Server, PostgreSQL, PL/SQL, Redis

AI: LLM integration & agentic workflows, LiteLLM (Claude/OpenAI/Gemini), LLM function-calling tools, AI-driven test automation, NLP

DevOps & BI: Docker, CI/CD pipelines, Jasper Reports, Crystal Reports, advanced SQL

Methodologies: Agile Scrum, UML, Object-Oriented Design, Git / GitHub
